Important Information

Thank you for purchasing a Festive Lights Ltd Giant Tree. Please read and understand all instructions carefully before assembly.

Safety Disclaimer
This manual contains safety information for the user of this product. The user is responsible for carefully reading and understanding this information prior to assembly and during product usage. Assembly and installation of this product is solely the responsibility of the user. This product is provided as is. The manufacturer is not responsible for any damage and injury that results from improper use of this product.

IMPORTANT: The user is responsible for safe and proper installation of this product. This includes proper rigging, floor and structural support, adaquate ballast and electrical grounding if necessary. Be aware of the surrounding environment during setup to prevent dangerous contact with obstacles. A competent installer of the tree is required.

Do NOT climb on the Tree Frame. Use appropriate equipment during assembly and disassembly.

This product is not suitable for outdoor placement/installation.

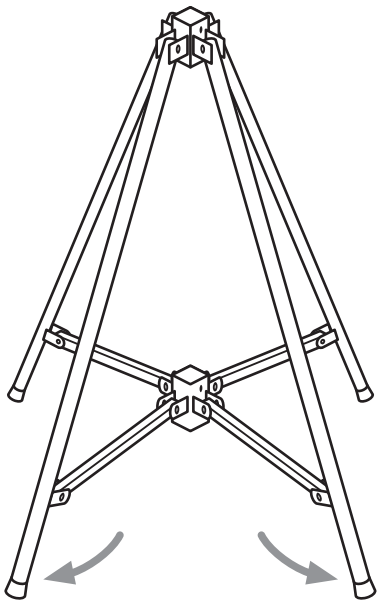

Product Assembly

OVERVIEW
Read all instructions before assembly. Unbox the product and check that all components and parts are available before assembly. Consult the Assembly Reference (p. 5) for more information.

Assemble the tree stand frame first. Make sure the entire structure is stable on a level surface before attaching branches and/or connecting power. Additional structural supports may be required that are not provided by the manufacturer.

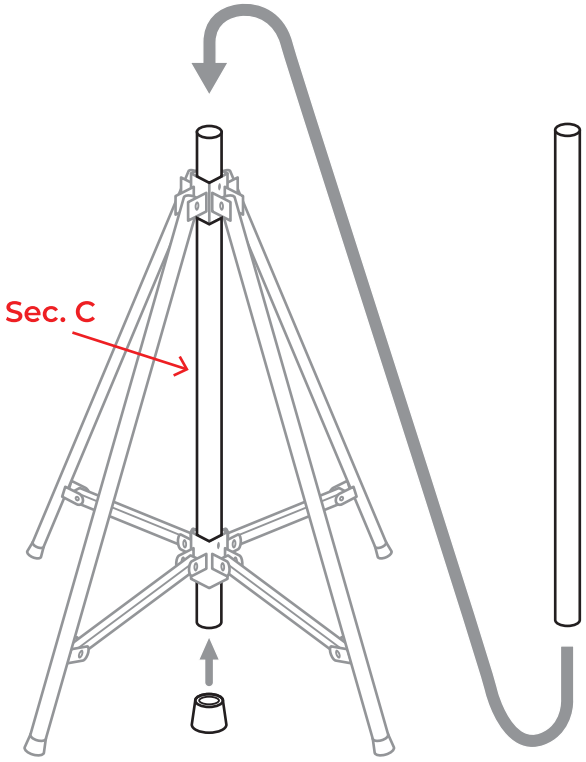

Branches may be attached after the main structure assembled. Shape all leaves and branches individually prior to attachment. For best results, install branches from the Tree Top down to the bottom Frame Ring.

1

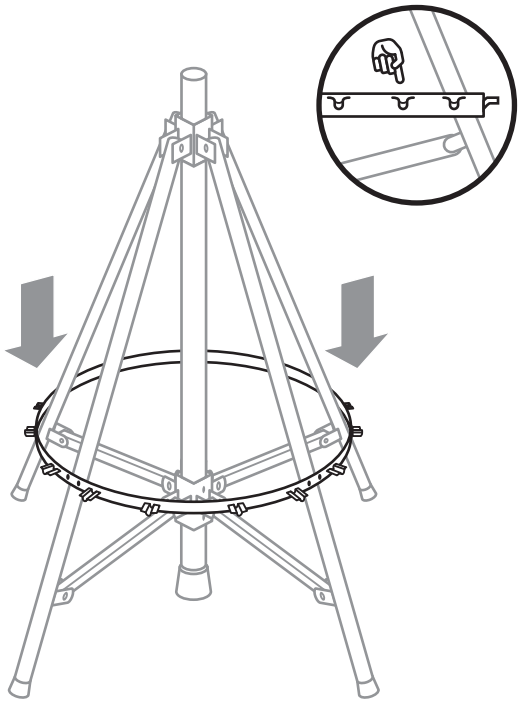

Remove the folded Base frame from the carton and unfold it on a flat, level surface.

2

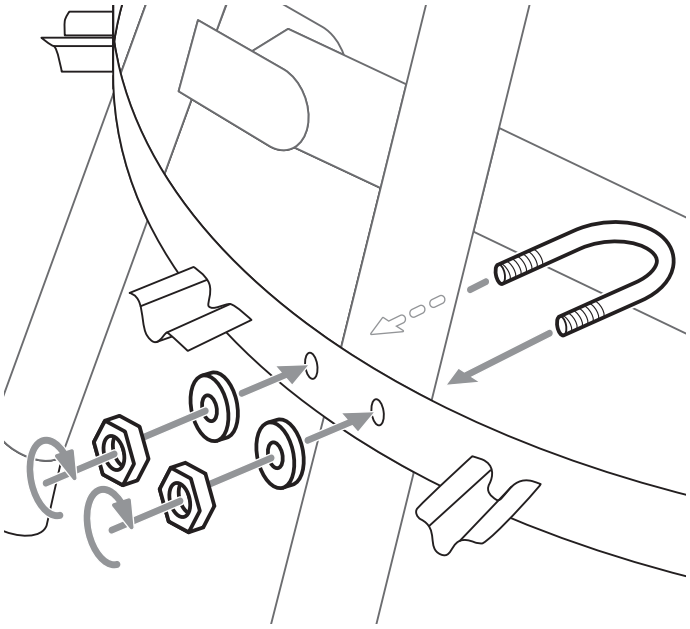

Find and insert Tree Pole section C through the top of the unfolded frame. Cap the bottom of the Tree Pole assembly with the rubber stopper.

3

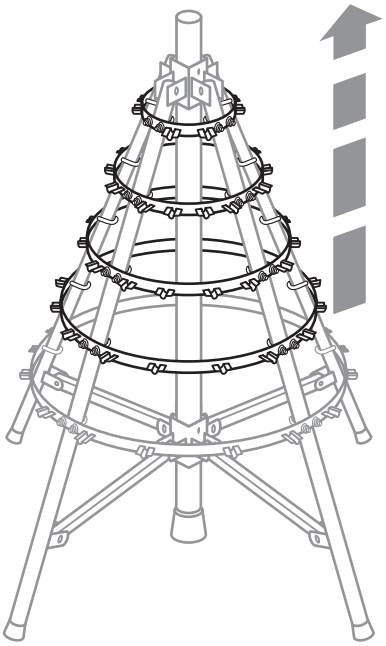

Find and place the bottom Branch Ring on the frame assembly. Make sure the Branch Ring is level, not tilted, and the branch hangers are facing up.

4

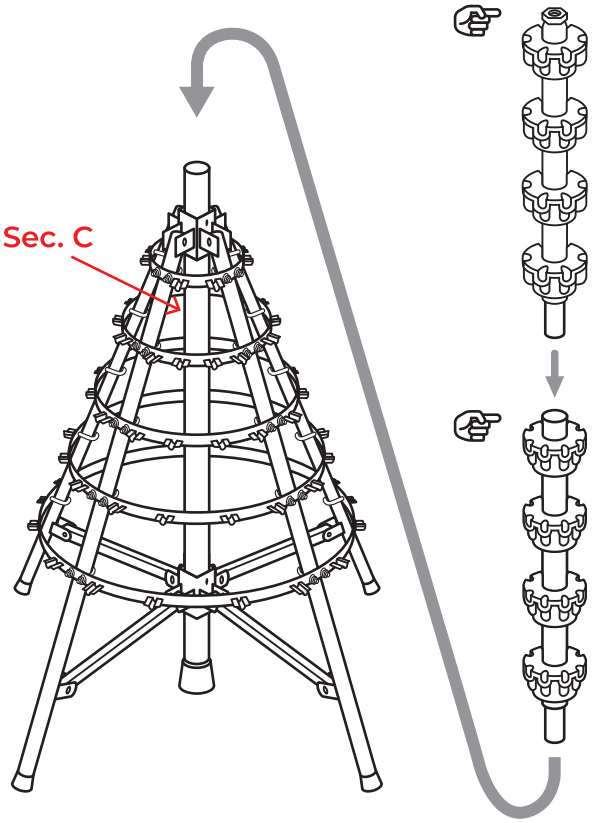

Attach the Branch Rings onto the frame with the provided U-Bolts, washers, and nuts (1/4”). Use four U-Bolts for each Branch Ring.

5

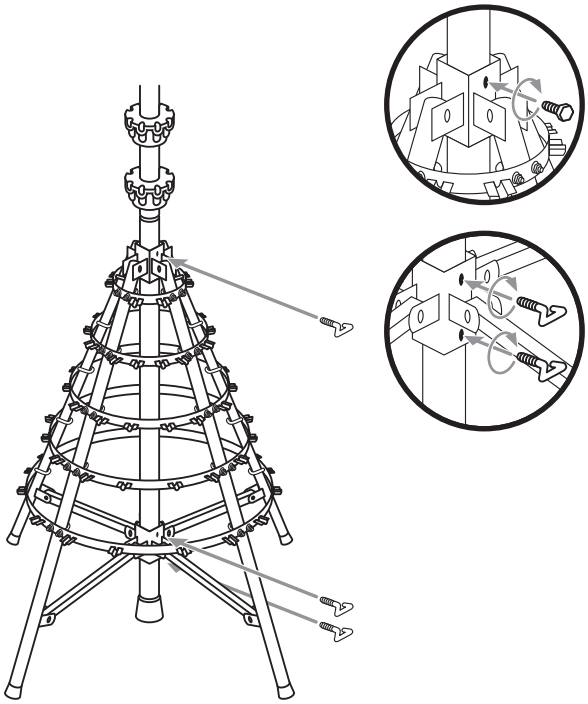

Install additional Branch Rings onto the frame assembly from largest to smallest in the same manner. Make sure to keep them level.

6

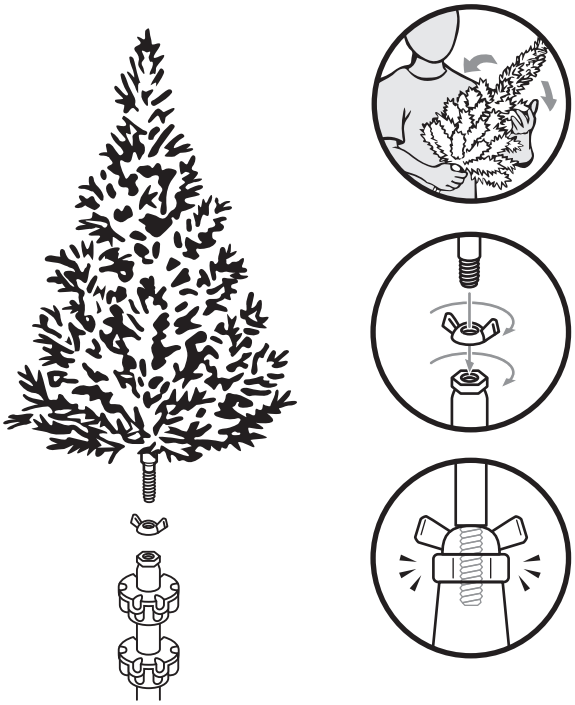

Connect Tree Pole sections B and A together. Note the difference between their top ends. Insert them into section C in the finished frame assembly.

7

Adjust and tighten the three thumb screws on the frame to make sure the Tree Pole is straight and secure. Make sure the completed assembly does not wobble. Use additional rigging if necessary (not included).

8

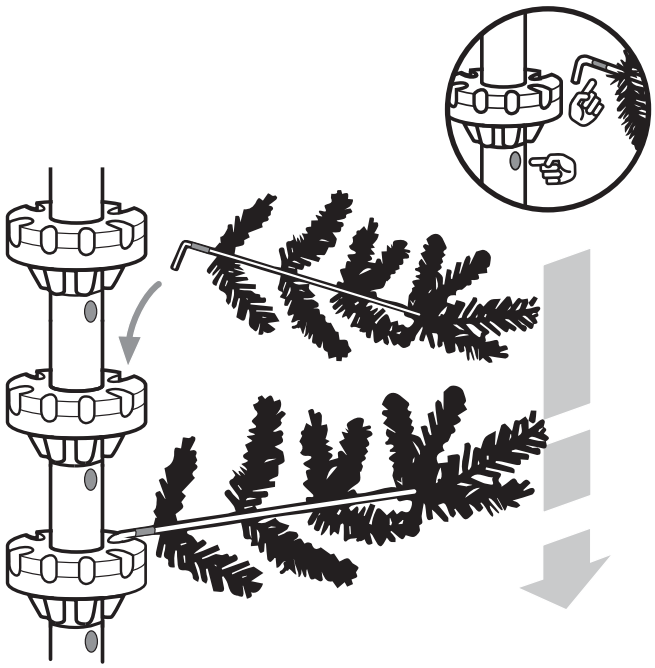

Shape the Tree Top and install it onto Tree Pole (Sec. A). Secure the Tree Top by tightening the wing nut as shown.

9

Sort and shape the Tree Branches according to their layer color.

10

Install the Tree Branches according to their layer color from top to bottom.

If your tree is pre-lit, refer to the Lighting and Electrical section before installing Branches.

Assembly Reference

BRANCH-LAYER LIST
Refer to the list below for Tree Branch quantity and location on the tree.

Section	Layer Code	Branch Color Code	Quantity
Tree Top	TT	- - -	1
Sec. A	1	Black/Orange	6
	2	Black/Green	6
	3	Black/Yellow	6
	4	Black/Blue	6
	5	Black/Red	6
	6	Black/White	6
	7	Green/Yellow	6
	8	Green/Blue	8
Sec. B	9	Green/Red	8
	10	Green/White	8
	11	Yellow/Blue	8
	12	Yellow/Red	8
	13	Blue/White	10
	14	Blue/Red	10
Tree Frame	15	Red/White	12
	16	Blue/Orange	14
	17	Green/Orange	16
	18	Red/Purple	18
	19	White/Orange	20

PRODUCT CROSS-SECTION
Refer to the diagram below during product assembly.
