

125cm Iridescent Reindeer With 80 White LED Lights and 110cm Iridescent Standing Reindeer With 70 White LED Lights Assembly Instructions.

Style A.

Style B.

- 1.Assemble the reindeer's feet to the body by inserting the wire tubes into the holes located on the body as shown (1).
- 2.Assemble the reindeer's head to the body by inserting the neck end into the body, using the zip tie to connect the metal rings located on the neck and body, then tighten. Attach the support brackets to the feet as shown (2).
- 3.Attach the horn and tail (3 & 4) , it is recommend to use cable ties to fix them securely, then attach the bow on to the reindeer's neck (anywhere you like). Your Reindeer is now ready.
